Title: A Laptop DrawerDrop

#### ABSTRACT OF THE DISCLOSURE

The Laptop DrawerDrop is a new solution to a computer space problem so there is nothing to compare it to. It is a one piece (excluding the thumbscrew) non-technological accessory for laptops that can be constructed from polymers, hard rubber, leather, or fine woods. The DrawerDrop uses the existing space of a desk without taking up the work surface of the actual desktop or unavailable floor space. It is completely portable and no assembly is required. This invention allows left handed people an option in the placement of their computers.
